

Bachelor Of Accounting

This course aims at introducing students to the fundamentals of bookkeeping and principles of financial accounting. It explains the accounting equation, identifies steps to complete the accounting cycle and discusses the role of accounting records in an organization. It further explains the differences between cash and accrual accounting, the nature of general purpose financial statements, the role of accounting information in making economic decisions and discusses the significance of accounting systems in providing relevant and reliable information. It also exposes students to financial statement analysis and interpretation of financial ratios.
